With the spotlight on plan fees becoming stronger and stronger, the importance of understanding and documenting your fees has never been a more important process. Join GPS Investment Advisors for a breakfast seminar and learn your best practices approach to negotiating fees for long term success.

- *What are the key drivers of total plan cost?*
- *What role does revenue sharing play?*
- *Are you getting the best deal possible?*

Analyzing the administrative, recordkeeping, investment management, employee education, and technology cost/value paradigms will create the leverage for a win/win/win we all look for. The participants win with either more services at the same cost or lower costs for the same services; the fiduciary wins through a documented fee-transparent process; and the service provider wins with the client positioned for a long-term relationship.

Additional Topic:

- *An update on recent retirement plan legislation, trends and best practices.*
